### Netflix Phishing Scam

There is a dangerous new phishing scam targeting users of Netflix.

Netflix subscribers receive emails urging you to update your billing information. The email includes a link to what appears to be a legitimate Netflix website. You are then asked to enter personal information, including credit card numbers. However, the link is to a fake website. **DO NOT CLICK THE LINK.**

Blue Maven advises you to never open any links directly from emails. Instead, open the website you wish to visit in an internet browser and complete any actions that may be requested in an email by manually navigating through the website you know and trust.

#### Tip 1

Phishing emails can appear to come from legitimate businesses. If an email looks suspicious, contact the sender **BEFORE** you click a link or open an attachment.

#### Tip 2

You never know where a phishing scam obtained your information. Never leave sensitive information in a conference room or a shared meeting area.
